HIGHLIGHTS OF VISALIA-TULARE-PORTERVILLE, CA NATIONAL COMPENSATION SURVEY JULY 2000

Workers in the Visalia-Tulare-Porterville, California, metropolitan area averaged \$15.35 per hour during July 2000, according to a new survey released by the U.S. Department of Labor's Bureau of Labor Statistics (BLS). Regional Commissioner Stanley P. Stephenson reported that white-collar workers averaged \$18.36 per hour and accounted for 57 percent of the workers in the area. Blue-collar employees averaged \$11.89 per hour and represented 25 percent of the workforce, while the remaining 18 percent worked in service occupations and earned \$11.61 per hour. (See table 1.)

The National Compensation Survey (NCS) presents straight-time earnings for occupations in establishments employing 50 or more workers in private industry and State and local governments. The survey excludes agricultural establishments, private households, the self-employed, and the Federal Government. This NCS covered 121 firms representing 41,200 workers in the Visalia-Tulare-Porterville metropolitan area, which includes Tulare County in California. Fifty-two percent of those represented worked in private industry.

In the Visalia-Tulare-Porterville metropolitan area, average hourly wages were published for nearly 40 detailed occupations. (See table 1.) Among white-collar workers, registered nurses averaged \$23.35 per hour; social workers, \$17.96; cashiers, \$11.27; and receptionists, \$8.71. Blue-collar occupations included automobile mechanics earning \$15.21 per hour, truck drivers at \$13.26, and hand packers and packagers at \$7.46. In the service occupations, public service police and detectives averaged \$24.09 per hour; janitors and cleaners, \$12.97; and early childhood teachers' assistants, \$7.31.

The NCS also provides broad coverage of selected occupational characteristics. (See table 2.) For example, full-time employees in the Visalia-Tulare-Porterville metropolitan area averaged \$16.34 per hour and part-time workers earned \$9.71. Union workers in blue-collar jobs averaged \$14.67 per hour; while their nonunion counterparts made \$10.66.

National Compensation Survey, Visalia-Tulare-Porterville, CA, July 2000 (continued)

The NCS is a part of a statistical program that will eventually integrate three separate surveys of wages and benefits into one comprehensive compensation program increasing the amount of data available. Data provided by the NCS may be used by businesses for establishing pay plans, making decisions concerning plant relocation, and in collective bargaining negotiations. Individuals may use such data to help choose potential careers. Average rates of pay are also available for levels of work within an occupation based on knowledge, skill, independent judgement, supervision received and other factors required on the job.

Survey Availability

Complete survey results are contained in the National Compensation Survey, Visalia-Tulare-Porterville, CA, July 2000 (Bulletin number 3105-54). While supplies last, single copies of the bulletin are available from the San Francisco Information Office by calling 415-975-4350. In addition, data contained in the bulletin are available on the Internet in both text and PDF formats at <http://www.bls.gov/compub.htm>. Select survey tables can also be obtained from Ready Facts, the Bureau's fax-on-demand service, in San Francisco by dialing 415-975-4567 and requesting document 9590.

For personal assistance or further information on the National Compensation Survey, as well as other Bureau programs, contact the San Francisco Economic Analysis & Information Office at 415-975-4350 from 9:00 a.m. to 11:30 a.m. and 1:30 p.m. to 4:00 p.m. pacific time.

1 Earnings are the straight-time hourly wages or salaries paid to employees. They include incentive pay, cost-of-living adjustments, and hazard pay. Excluded are premium pay for overtime, vacations, holidays, nonproduction bonuses, and tips. The mean is computed by totaling the pay of all workers and dividing by the number of workers, weighted by hours.

2 All workers include full-time and part-time workers.

3 A classification system including about 480 individual occupations is used to cover all workers in the civilian economy.

4 The relative standard error (RSE) is the standard error expressed as a percent of the estimate. It can be used to calculate a confidence interval around a sample estimate.

NOTE: Dashes indicate that no data were reported or that data did not meet publication criteria, and n.e.c. means not elsewhere classified. Overall occupational groups may include data for categories not shown separately. IN THIS SURVEY, THE NONRESPONSE RATE FOR PRIVATE INDUSTRY EXCEEDED REGULAR SURVEY STANDARDS FOR PUBLICATION. ACCORDINGLY, USERS SHOULD INTERPRET THESE RESULTS WITH THIS LIMITATION IN MIND.

1 Earnings are the straight-time hourly wages or salaries paid to employees. They include incentive pay, cost-of-living adjustments, and hazard pay. Excluded are premium pay for overtime, vacations, holidays, nonproduction bonuses, and tips. The mean is computed by totaling the pay of all workers and dividing by the number of workers, weighted by hours.

2 A classification system including about 480 individual occupations is used to cover all workers in the civilian economy.

3 Employees are classified as working either a full-time or a part-time schedule based on the definition used by each establishment. Therefore, a worker with a 35-hour-per-week schedule might be considered a full-time employee in one establishment, but classified as part-time in another firm, where a 40-hour week is the minimum full-time schedule.

4 Union workers are those whose wages are determined through collective bargaining.

5 Time workers' wages are based solely on an hourly rate or salary; incentive workers are those whose wages are at least partially based on productivity payments such as piece rates, commissions, and production bonuses.

NOTE: Dashes indicate that no data were reported or that data did not meet publication criteria. IN THIS SURVEY, THE NONRESPONSE RATE FOR PRIVATE INDUSTRY EXCEEDED REGULAR SURVEY STANDARDS FOR PUBLICATION. ACCORDINGLY, USERS SHOULD INTERPRET THESE RESULTS WITH THIS LIMITATION IN MIND.

Table 3. Establishment employment size: Mean hourly earnings(1) by occupational group,(2) private industry, National Compensation Survey, Visalia-Tulare-Porterville, CA, July 2000

Occupational group	Full-time and part-time workers				
	All private industry workers	50 - 99 workers ³	100 workers or more		
			Total	100 - 499 workers	500 workers or more
